Subject Index of Volume 213

Adhesion
microindentation adhesion tester and its application to thin films, 220
Alkali metals
Raman scattering from monoalkali (Na–Sb and K–Sb), bialkali (Na–K–Sb) and multialkali (Na–K–Sb–Cs) photocathodes, 99
Alloys
two-dimensional Monte Carlo model for thin film growth by oblique evaporation: simulation of two-component systems for the example of Co–Cr, 143
dealloying properties of Pt–NiCr thin films on glass, 19
electrochemical behaviour of some Pb–Sb alloys in sulphuric acid solutions I: Effect of chloride ions, 244
microindentation adhesion tester and its application to thin films, 220
surface composition and microhardening in nitrogen and boron implanted nimonic-90 alloy, 192
Aluminium
determination of the diffusion coefficient of aluminium along the grain boundaries of gold films by the surface accumulation method, 103
Aluminium nitride
effects of an AlN nucleation layer on magnetron-sputtered indium nitride films, 86
Aluminium oxide
growth of γ-Al_2O_3 thin films on silicon by low pressure metal–organic chemical vapour deposition, 72
second harmonic generation in 2-methyl-4-nitroaniline-doped alumina film prepared by a sol–gel process, 126
Amorphous materials
amorphous silicon, amorphous carbon and amorphous silicon carbide deposited by remote plasma chemical vapor deposition, 170
preparation and characterization of amorphous SeTe/CdSe superlattices and their constituent thin layers, 230
Annealing
effect of oxygen impurity on growth of molybdenum disilicide and its distribution during rapid thermal annealing of co-sputtered $MoSi_x$ thin films, 45
Antimony
electrochemical behaviour of some Pb–Sb alloys in sulphuric acid solutions I: Effect of chloride ions, 244

Baud structure
excited state spectroscopy of CdTe–$Cd_{0.9}Mn_{0.1}$Te multiple quantum wells grown by pulsed laser evaporation and epitaxy, 155
Biomaterials
study of photocycle and spectral properties of bacteriorhodospin in Langmuir–Blodgett films, 277
Boron
surface composition and microhardening in nitrogen and boron implanted nimonic-90 alloy, 192

Cadmium selenide
preparation and characterization of amorphous SeTe/CdSe superlattices and their constituent thin layers, 230
Cadmium sulphide
influence of thickness and index inhomogeneities on the transmission of semiconductor thin films, 55
Cadmium telluride
CdTe(111) growth on sapphire(0001) substrates by hot wall epitaxy, 1
excited state spectroscopy of CdTe–$Cd_{0.9}Mn_{0.1}$Te multiple quantum wells grown by pulsed laser evaporation and epitaxy, 155
Capacitors
carrier transport and storage in Si_3N_4 for metal–nitride–oxide–semiconductor memory applications, 235
Carbides
influence of deposition conditions on the morphology of sputtered W–C–(Co) films, 6
Carbon
amorphous silicon, amorphous carbon and amorphous silicon carbide deposited by remote plasma chemical vapor deposition, 170
microindentation adhesion tester and its application to thin films, 220
Chemical vapour deposition
chemical foundations in understanding the step coverage problem in chemical vapour deposition using silane chemistry, 160
growth of γ-Al_2O_3 thin films on silicon by low pressure metal–organic chemical vapour deposition, 72
silicon nitride films deposited from SiH_2Cl_2–NH_3 by low pressure chemical vapor deposition: kinetics, thermodynamics, composition and structure, 182
thin films of high-resistivity zinc oxide produced by a modified CVD method, 94
Chromium
two-dimensional Monte Carlo model for thin film growth by oblique evaporation: simulation of two-component systems for the example of Co–Cr, 143
dealloying properties of Pt–NiCr thin films on glass, 19
effect of film history on the change in its properties under irradiation, 40
Coatings
finite element analysis of the contact stresses in an elastic coating on an elastic substrate, 205
Cobalt
two-dimensional Monte Carlo model for thin film growth by oblique evaporation: simulation of two-component systems for the example of Co–Cr, 143
Computer simulation
finite element analysis of the contact stresses in an elastic coating on an elastic substrate 205
Contacts
electrical characterization of Langmuir–Blodgett films of poly(3-hexylthiophene) by utilizing rectifying contacts, 117
vacuum annealing characteristics of electron beam evaporated ruthenium contacts to n-GaAs grown by organometallic vapour phase epitaxy, 113
Copper
copper oxide thin films grown by plasma evaporation method, 226

Deposition processes
chemical foundations in understanding the step coverage problem in chemical vapour deposition using silane chemistry, 160
deposition and characterization of thin electroless palladium films from newly developed baths, 64
influence of deposition conditions on the morphology of sputtered W–C–(Co) films, 6
transparent conducting ZnO films deposited by ion-beam-assisted reactive deposition, 109
Depth profiling
X-ray phase analysis with depth profiling for thin films, 13
Diffusion
determination of the diffusion coefficient of aluminium along the grain boundaries of gold films by the surface accumulation method, 103

Electrical properties
carrier transport and storage in Si_3N_4 for metal–nitride–oxide–semiconductor memory applications, 235
effects of an AlN nucleation layer on magnetron-sputtered indium nitride films, 86
electrical characterization of Langmuir–Blodgett films of poly(3-hexylthiophene) by utilizing rectifying contacts, 117
Hall effect and magnetoresistance in Au/SiO_x thin films, 76
study of sputtered HfO_2 thin films on silicon, 257
transparent conducting ZnO films deposited by ion-beam-assisted reactive deposition, 109
vacuum annealing characteristics of electron beam evaporated ruthenium contacts to n-GaAs grown by organometallic vapour phase epitaxy, 113
Electrochemistry
electrochemical behaviour of some Pb–Sb alloys in sulphuric acid solutions I: Effect of chloride ions, 244
Electronic devices
carrier transport and storage in Si_3N_4 for metal–nitride–oxide–semiconductor memory applications, 235
Epitaxy
CdTe(111) growth on sapphire(0001) substrates by hot wall epitaxy, 1
growth of γ-Al_2O_3 thin films on silicon by low pressure metal-organic chemical vapour deposition, 72
Evaporation
two-dimensional Monte Carlo model for thin films growth by oblique evaporation: simulation of two-component systems for the example of Co–Cr, 143

Fluorides
antireflection coatings in KCl single-crystal optical elements for optical systems of continuous and pulsed technological lasers, 251

Gallium arsenide
vacuum annealing characteristics of electron beam evaporated ruthenium contacts to n-GaAs grown by organometallic vapour phase epitaxy, 113
Gold
determination of the diffusion coefficient of aluminium along the grain boundaries of gold films by the surface accumulation method, 103
Hall effect and magnetoresistance in Au/SiO_x thin films, 76
microindentation adhesion tester and its application to thin films, 220
Grain boundaries
determination of the diffusion coefficient of aluminium along the grain boundaries of gold films by the surface accumulation method, 103
Growth mechanism
two-dimensional Monte Carlo model for thin film growth by oblique evaporation: simulation of two-component systems for the example of Co–Cr, 143

Hafnium
study of sputtered HfO_2 thin films on silicon, 257
Hall effect
Hall effect and magnetoresistance in Au/SiO_x thin films, 76

Impurities
effect of oxygen impurity on growth of molybdenum disilicide and its distribution during rapid thermal annealing of co-sputtered $MoSi_x$ thin films, 45
Infrared spectroscopy
IR spectroscopic investigation of SiO_2 film structure, 164
preparation of polyimide Langmuir–Blodgett films containing $[Ru(bpy)_3]^{2+}$ complex, 295
Interfaces
finite element analysis of the contact stresses in an elastic coating on elastic substrate, 205
Ion bombardment
effect of film history on the change in its properties under irradiation, 40
Ion implantation
influence of nitrogen ion implantation on tensile behavior of 1018 carbon steel, 27
surface composition and microhardening in nitrogen and boron implanted nimonic-90 alloy, 191
Iron
thin pyrite (FeS_2) films prepared by magnetron sputtering, 271

Langmuir–Blodgett films
comparative optical reflection and mass spectrometry analysis of thermodesorption of Langmuir–Blodgett films, 136
electrical characterization of Langmuir–Blodgett films of poly(3-hexylthiophene) by utilizing rectifying contacts, 117
Langmuir–Blodgett films of phthalocyanine derivatives: mono- and multilayer films prepared from phthalocyanine derivatives containing polar and cationic substituents, 286
molecular coagulation of substituted phthalocyaninato–polysiloxanes at the air–water interface, 130
preparation of polyimide Langmuir–Blodgett films containing $[Ru(bpy)_3]^{2+}$ complex, 295
study of photocycle and spectral properties of bacteriorhodospin in Langmuir–Blodgett films, 277
Laser irradiation
oxidation interference in direct laser nitridation of titanium: relative merits of various ambient gases, 197
Lead
electrochemical behaviour of some Pb–Sb alloys in sulphuric acid solutions I: Effect of chloride ions 244
Light scattering
comparative optical reflection and mass spectrometry analysis of thermodesorption of Langmuir–Blodgett films, 136

Molybdenum
effect of oxygen impurity on growth of molybdenum disilicide and its distribution during rapid thermal annealing of co-sputtered $MoSi_x$ thin films, 45

Monolayers
Langmuir–Blodgett films of phthalocyanine derivatives: mono- and multilayer films prepared from phthalocyanine derivatives containing polar and cationic substituents, 285
Morphology
Effects of an AlN nucleation layer on magnetron-sputtered indium nitride films, 86
Multilayers
excited state spectroscopy of CdTe–$Cd_{0.9}MN_{0.1}Te$ multiple quantum wells grown by pulsed laser evaporation and epitaxy, 155
Langmuir–Blodgett films of phthalocyanine derivatives: mono- and multilayer films prepared from phthalocyanine derivatives containing polar and cationic substituents, 286

Nickel
dealloying properties of Pt–NiCr thin films on glass, 19
effect of film history on the change in its properties under irradiation, 40
spectrally selective black nickel coating by a conversion process, 80
surface composition and microhardening in nitrogen and boron implanted nimonic-90 alloy, 192
Nitrides
oxidation interference in direct laser nitridation of titanium: relative merits of various ambient gases, 197
Nitrogen
influence of nitrogen ion implantation on tensile behavior of 1018 carbon steel, 27
silicon nitride films deposited from SiH_2Cl_2–NH_3 by low pressure chemical vapor deposition: kinetics, thermodynamics, composition and structure, 182
surface composition and microhardening in nitrogen and boron implanted nimonic-90 alloy, 192

Optical coatings
Anitreflection coatings on KCl single-crystal optical elements for optical systems of continuous and pulsed technological lasers, 251
Optical properties
antireflection coatings on KCl single-crystal elements for optical systems of continuous and pulsed technological lasers, 252
comparative optical reflection and mass spectrometry analysis of thermodesorption of Langmuir–Blodgett films, 136
copper oxide thin films grown by plasma evaporation method, 226
effects of an AlN nucleation layer on magnetron-sputtered indium nitride films, 86
spectrally selective black nickel coating by a conversion process, 80
influence of thickness and index inhomogeneities on the transmission of semiconductor thin films, 55
transparent conducting ZnO films deposited by ion-beam-assisted reactive deposition, 109
Optical spectroscopy
excited state spectroscopy of CdTe–$Cd_{0.9}MN_{0.1}Te$ multiple quantum wells grown by pulsed laser evaporation and epitaxy, 155
Langmuir–Blodgett films of phthalocyanine derivatives: mono- and miltilayer films prepared from phthalocyanine derivatives containing polar and cationic substituents, 285
study of photocycle and spectral properties of bacteriorhodospin in Langmuir–Blodgett films, 277

Organic substances
second harmonic generation in 2-methyl-4-nitroaniline-doped alumina film prepared by a sol–gel process, 126
Oxides
copper oxide thin films grown by plasma evaporation method, 226
study of sputtered HfO_2 thin films on silicon, 257

Palladium
deposition and characterization of thin electroless palladium films from newly developed baths, 64
Photoconductivity
photoconducting TiO_2 prepared by spray pyrolysis using $TiCl_4$, 265
preparation of polyimide Langmuir–Blodgett films containing $[Ru(bpy)_3]^{2+}$ complex, 295
Physical vapour deposition
influence of deposition conditions on the morphology of sputtered W–C–(Co) films, 6
study of sputtered HfO_2 thin films on silicon, 257
thin pyrite (FeS_2) films prepared by magnetron sputtering, 271
Plasma processing
copper oxide thin films grown by plasma evaporation method, 226
Platinum
dealloying properties of Pt–NiCr thin films on glass, 19
Polymers
molecular coagulation of substituted phthalocyaninato–polysiloxanes at the air–water interface, 130
preparation of polyimide Langmuir–Blodgett films containing $[Ru(bpy)_3]^{2+}$ complex, 295
Pyrolysis
photoconducting TiO_2 prepared by spray pyrolysis using $TiCl_4$, 265

Raman spectroscopy
Raman scattering from monoalkali (Na–Sb and K–Sb), bialkali (Na–K–Sb) and multialkali (Na–K–Sb–Cs) photocathodes, 99
Reaction kinetics
chemical foundations in understanding the step coverage problem in chemical vapour deposition using silane chemistry, 160
stresses from solid state reactions: a simple model, silicides, 34
Resistivity
thin films of high-resistivity zinc oxide produced by a modified CVD method, 94
Ruthenium
vacuum annealing characteristics of electron beam evaporated ruthenium contacts to n-GaAs grown by organometallic vapour phase epitaxy, 113

Sapphire
CdTe(111) growth on sapphire(0001) substrates by hot wall epitaxy, 1
Second harmonic generation
second harmonic generation in 2-methyl-4-nitroaniline-doped alumina film prepared by a sol–gel process, 126
Selenium
preparation and characterization of amorphous SeTe/CdSe superlattices and their constituent thin layers, 230
Semiconductors
influence of thickness and index inhomogeneities on the transmission of semiconductor thin films, 55

Silicides
stresses from solid state reactions: a simple model, sillicides, 34
effect of oxygen impurity on growth of molybdenum disilicide and its distribution during rapid thermal annealing of co-sputtered $MoSi_x$ thin films, 45
Silicon
amorphous silicon, amorphous carbon and amorphous silicon carbide deposited by remote plasma chemical vapor deposition, 170
effect of film history on the change in its properties under irradiation, 40
silicon nitride films deposited from SiH_2Cl_2–NH_3 by low pressure chemical vapor deposition: kinetics, thermodynamics, composition and structure, 182
influence of thickness and index inhomogeneities on the transmission of semiconductor thin films, 55
Silicon carbide
amorphous silicon, amorphous carbon and amorphous silicon carbide deposited by remote plasma chemical vapor deposition, 170
Silicon dioxide
novel method for measuring the thermal conductivity of submicrometre thick dielectric films, 176
IR spectroscopic investigation of SiO_2 film structure, 164
Silicon nitride
carrier transport and storage in Si_3N_4 for metal–nitride–oxide–semiconductor memory applications, 235
Silicon oxide
determination of stoichiometry of SiO_x thin films using an Auger parameter, 158
Hall effect and magnetoresistance in Au/SiO_x thin films, 76
Steel
influence of nitrogen ion implantation on tensile behavior of 1018 carbon steel, 27
Stress
finite element analysis of the contact stresses in an elastic coating on an elastic substrate, 205
stresses from solid state reactions: a simple model, silicides, 34
Structural properties
dealloying properties of Pt–NiCr thin films on glass, 19
IR spectroscopic investigation of SiO_2 film structure, 164
Raman scattering from monoalkali (Na–Sb and K–Sb), bialkali (Na–K–Sb) and multialkali (Na–K–Sb–Cs) photocathodes, 99
Sulfides
thin pyrite (FeS_2) films prepared by magnetron sputtering, 271
Superlattices
preparation and characterization of amorphous SeTe/CdSe superlattices and their constituent thin layers, 230
Surface morphology
deposition and characterization of thin electroless palladium films from newly developed baths, 64
influence of deposition conditions on the morphology of sputtered W–C–(Co) films, 6
oxidation interference in direct laser nitridation of titanium: relative merits of various ambient gases, 197
spectrally selective black nickel coating by a conversion process, 80
Surface pressure
molecular coagulation of substituted phthalocyaninato–polysiloxanes at the air–water interface, 130

Tellerium
preparation and characterization of amorphous SeTe/CdSe superlattices and their constituent thin layers, 230
Thermal properties
a novel method for measuring the thermal conductivity of submicrometre thick dielectric films, 176
Titanium
oxidation interference in direct laser nitridation of titanium: relative merits of various ambient gases, 197
Titanium oxide
photoconducting TiO_2 prepared by spray pyrolysis using $TiCl_4$, 265
Transmission electron microscopy
molecular coagulation of substituted phthalocyaninato–polysiloxanes at the air–water interface, 130
Tungsten
influence of deposition conditions on the morphology of sputtered W–C–(Co) films, 6

X-ray diffraction
CdTe(111) growth on sapphire(0001) substrates by hot wall epitaxy, 1
copper oxide thin films grown by plasma evaporation method, 226
dealloying properties of Pt–NiCr thin films on glass, 19
preparation and characterization of amorphous SeTe/CdSe superlattices and their constituent thin layers, 230
study of sputtered HfO_2 thin films on silicon, 257
effect of oxygen impurity on growth of molybdenum disilicide and its distribution during rapid thermal annealing of co-sputtered $MoSi_x$ thin films, 45
thin pyrite (FeS_2) films were prepared by magnetron sputtering, 271
X-ray phase analysis with depth profiling for thin films, 13
X-ray photoelectron spectroscopy
determination of stoichiometry of SiO_x thin films using an Auger parameter, 158
surface composition and microhardening in nitrogen and boron implanted nimonic-90 alloy, 192

Zinc oxide
thin films of high-resistivity zinc oxide produced by a modified CVD method, 94
transparent conducting ZnO films deposited by ion-beam-assisted reactive deposition, 109
